Pitt Med Professionalism Accolade

CONGRATULATIONS!

Evette Yassa, MD, MSc

Faculty
Department of Family Medicine

Dr. Yassa was a clinical preceptor at my Family Medicine site. She was immediately very intentional about creating a comfortable, communicative, and encouraging learning environment. She set clear expectations at the beginning of the rotation and gave helpful and constructive feedback every day. Dr. Yassa was very conscientious and thoughtful towards my experience as a student and took measures to ensure I felt included and comfortable. She is committed to becoming a great teacher and asked for feedback from me every day to see how she could improve as an educator. She appropriately challenged me as a learner in a way that was thoughtful and beneficial to my education. Her warmth, kindness, and humor made the experience all the more welcoming and fun.

Additionally, her philosophy towards medicine and family medicine was very inspiring to me as a learner. Throughout my rotation she shared her human approach to medicine, and she practiced this philosophy on a personal level every day. During every patient encounter she was totally engaged, kind, and receptive to the person in front of her. She was very intentional about understanding the needs and goals of her patients and empowering them. It was clear she cares deeply about her patients.
