Pitt Med Professionalism Accolade

CONGRATULATIONS!

Amani Davis, MD
PGY2 Resident
Department of
Ophthalmology

Amani was an outstanding teacher on my specialty care rotation. On the busy ophthalmology consult service, he took the time to teach me about procedures and conditions that we didn't get to see but that he thought I should understand. He always made time for questions and asked about my career interests so that he could tailor his teaching to what he thought would be beneficial for me to understand in my future career. I went into the week feeling uncertain about my ophthalmology knowledge base and left prepared and excited to tackle these issues in the future.
