Pitt Med Professionalism Accolade

CONGRATULATIONS!

Anthony Lentscher, MD, PhD

PGY1 Resident
Department of Pediatrics

Anthony was an exceptional mentor and educator during our time together on my pediatric clerkship. From day one, he constantly checked in on my well-being and ensured I felt valued within the team, despite the fact that this was only my second rotation. Whether helping me prepare for success on rounds, teaching me about vital pediatric topics, or offering unwavering encouragement, Anthony was profoundly supportive and helped me feel confident in what I could offer as a medical student. His compassion extended to each of his patients, and the empathy he modeled with each patient interaction epitomized everything I aspire to be in medicine. Remarkably, he accomplished all of this as a brand new intern, managing these responsibilities while handling a heavy workload and adjusting to life as a resident doctor. His dedication deserves the highest praise, and his kindness and consideration will undoubtedly shape my future in pediatrics for years to come.
