CONGRATULATIONS!

Julia Bulova

MS2 Student

I had the great pleasure of working with Julia in small groups for the entirety of our MS2 year. She has been one of the most consistently engaged and supportive students I've worked with. Her active participation, thorough preparation before every session, and insightful comments during sensitive discussions made her a valuable member of our group. Especially in moments when our group struggled to approach difficult topics, Julia was the first to offer opening remarks. Her ability to create a friendly and non-judgmental environment encouraged all of us to increasingly participate over the year. We also benefited tremendously from Julia's willingness to advocate for our group. I recall several times when she took it upon herself to troubleshoot or seek out help for technical issues preventing us from beginning sessions. Overall, I feel lucky to have worked with her in our most challenging courses this year!
