PITT MED PROFESSIONALISM ACCOLADE

SIMION CHIOSEA, MD

Faculty
Department of Pathology
Divisions of Anatomic Pathology and Molecular Genomic Pathology

"Dr. Chiosea has been an exceptional research mentor. From contextualizing the significance of our project by setting up times to review gross images in pathology lab to providing real time feedback and collaboration regarding the direction of our paper, Dr. Chiosea was an incredibly responsive senior author and provided ongoing, hands-on support to a degree I have yet to witness on other projects.

In addition to casting the vision for our investigative research, he played major roles in assisting with sections of manuscript composition and overall editing. He provided ongoing encouragement and support that gave me the confidence and tools to successfully publish our work and also mentor student colleagues in research. I am sincerely grateful for Dr. Chiosea's mentorship, and his demonstration of exemplary professionalism, passion for teaching, and research and writing acumen."
