PITT MED PROFESSIONALISM ACCOLADE

ALLISON BROPHY

MS1 Student

"Allison demonstrated exceptional grit and leadership during our small group, where we faced a challenging situation...in the face of such adversity, Allison assumed responsibility on countless occasions to teach her peers, when there was no expectation or requirement to do so. I truly believe that much of our small group's success during Keystone Fundamentals I was due to Allison's contributions to the group. She explained concepts on the board, created memorable mnemonics, and enabled a space that welcomed questions from all students.

At the same time, Allison always maintained a respectful demeanor...and spoke to administration with the same respect and kindness. Her approach to our small group dynamics during Keystone Fundamentals I is a testament to her resilience, tenacity, and the competent doctor she will make."
