ETHAN WU

MS2 Student

"Ethan Wu has been a dedicated, ambitious, and hardworking educator who has shown a strong commitment to teaching the *All of Us: Machine Learning in Medicine* course. This class is designed to immerse medical students in the use of the NIH All of Us Dataset for research. Over the past twelve weeks, Ethan has led the course both in person and through Zoom, and he has remained consistently available for questions and guidance. He regularly demonstrates creativity and thoughtfulness in his teaching, finding clear and meaningful ways to explain complex concepts. His approachable and nonjudgmental nature creates a welcoming and meaningful learning environment for all students. Outside of the classroom, Ethan is always open to feedback and continually focused on research, learning, and growth. I am grateful for the opportunity to learn from and alongside him."
