PITT MED PROFESSIONALISM ACCOLADE

BETHANY HILEMAN

MS4 Student

"Bethany is an amazing anatomy teaching assistant! She is talented in not just her exceptional knowledge of the anatomy material but also demonstrates it every day to her students. I am so thankful for her taking hours each day to be in the anatomy lab, lead office hours, and even meet with students individually. Bethany knows how to help students truly learn and provides tips and feedback to help them grasp the material well. She is patient when students are unsure and takes the time to explain. She even lets the students teach the material to her to help them solidify their understanding. Overall, I am so grateful for her mentoring and guidance throughout this course, and I have learned so much from her."
