PITT MED PROFESSIONALISM ACCOLADE

ALLISON BROPHY

MS2 Student

"During the demanding Neurology block, Allison demonstrated exceptional dedication by passionately advocating for positive curriculum improvements and offering office hours for course suggestions early in the block. Despite managing an immense volume of material, she consistently brought positivity to her own learning and to that of her peers, fostering a supportive and engaging environment for studying Neuroscience.

Beyond her role on the curriculum committee, Allison remains an engaged, compassionate student who cares deeply about both her own growth and the success of those around her. She is a positive, uplifting person I am thankful I have the opportunity to learn with."
