

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Andrea Carter, MD

Assistant Professor
Medicine, General Internal Medicine

Dr. Carter was an exemplary attending during my AI. A moment that stands out is when ...Dr. Carter did a fantastic job navigating a tough [patient] situation. She met with the family and heard their concerns and then she reset expectations for both the family and our team. She laid out a plan that advocated for the patient while also doing what was medically indicated. Overall, I was really impressed with how Dr. Carter handled this situation and I still think about it months later.
