Pitt Med Professionalism Accolade

CONGRATULATIONS!

Gary Gruen, MD

Professor
Department of Orthopaedic Surgery

Dr. Gruen went out of his way to connect with each patient while balancing time teaching students and residents on the team, mentoring trainees in research projects, and fielding questions from patients and colleagues. I was impressed by the genuine attention and care he gave to each person's needs. Several patients stated how profoundly grateful they were to feel so heard, understood, and well taken care of by Dr. Gruen over the years and it was clear that he had positively impacted their lives.
