

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Julie McCausland, MD
Department of Emergency Medicine

Dr. McCausland did a terrific job at fostering student exploration of relevant clinical management and supplementing with relevant clinical anecdotes to supplement our learning. I believe she fully embodies the idea of providing patient-centered, humanistic care. Many times throughout the course she stressed the importance of SDoH, recognizing/combating bias in the medical field (e.g. avoiding labeling patients "drug-seeking", attributing all issues to substance use disorders). I beyond grateful that she had a hand in my medical education.
