

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Vildan Tas, MD, FAAP
Faculty, Department of Pediatrics

I worked with Dr. Tas at several Pediatric clinics during my Peds core clerkship. Each time I worked with her, she consistently strove to create a positive and supportive learning environment. She went above and beyond to teach students any time she had the opportunity, from playing developmental milestone jeopardy, bringing in board question flashcards, to thoroughly reviewing the vaccination schedule. She often gave meaningful, specific feedback on clinical performance, helped students feel involved in patient care and was cognizant of and genuinely appreciative of the efforts medical students put into patient care. Not only does she excel as an educator, she is also a fantastic clinician. We are lucky to have her at this institution and as the new Outpatient Pediatric Clerkship Director!
