

Pitt Med Professionalism Accolade

CONGRATULATIONS!

**Blaise Abramovitz, DO,
FASN**
Faculty
Department of Medicine

Dr. Abramovitz was a wonderful facilitator and course director that ensured all students understood the material and what was important for the class and boards. His teaching style facilitated discussion and equal participation among all the students, and his explanations were straightforward and made the kidney seem fun. Additionally, the course, as it is designed, is incredibly organized, with useful workshops and incredible lectures and syllabus notes. The course directors also provided explanations to many of the First Aid diagrams, setting us up to do well for Step. Dr. Abramovitz also brought us baked goods for nearly all workshops, brightening our 8ams!
