

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Blaise Abramovitz
Faculty
Department of Medicine

Dr. Abramovitz was the best small group facilitator I have had in my 1.5 years here at Pitt Med. I usually dread workshops - feeling lost in the material makes me feel even further behind. For the first time in a course, I actually looked forward to attending. Against all odds, Dr. Abramovitz actually had me geeking out over renal. His energy and passion for the material and his job was absolutely infectious and I looked forward to coming in even for an 8am workshop. I felt like our group was able to establish a great relationship and rapport with him and each other and it made learning a lot easier and a lot more enjoyable. His complete lack of judgement or shame when people got answers wrong also encouraged people to take an educated guess instead of saying silent, myself included. I wish Dr. Abramovitz could teach all of our small group sessions. (P.S.- he breaks the mold for stereotypical "doctor" handwriting...his written and drawn material was amazing!)
