

Pitt Med Professionalism Accolade

CONGRATULATIONS!

I worked with Dr. Phillips on my first day of being in an OR, and she was extremely kind and made me feel like I was part of the team. She took the time to show me proper scrubbing technique, gave me the opportunity for hands-on learning, and created a safe learning environment where I felt comfortable asking questions. Additionally, Dr. Phillips's bedside manners were inspiring. She offered reassurance to patients before their surgeries, held their hand while they were being prepped, and waited after the surgery for them to wake up. I truly enjoyed working with her and appreciate the time she took to teach me.
