

Pitt Med Professionalism Accolade

CONGRATULATIONS!

**Helbert Rondon, MD, MS,
FACP, FASN, FNKF**

Faculty
Department of Medicine

Dr. Rondon was an outstanding facilitator for our Body Fluid Homeostasis Renal course. He went above and beyond what most facilitators do, including coming to the class an hour early to write diagrams on all the whiteboards and creating separate worksheets for us to conceptualize the material. Our small group felt that his instruction singlehandedly helped us succeed in renal, a notoriously difficult topic. Dr. Rondon's commitment to medical student education and passion for his field is inspiring, and his excellence in teaching is well-deserving of recognition.
