

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Michaela Barry, MD

**Resident
Department of Medicine**

Dr. Michaela Barry exemplified the idea of a humanistic physician-educator, not only to the team but also to our patients. She dedicated much of her time to ensuring that we took care of ourselves so that we could better care for the patients on our service. She consistently went above and beyond to take care of our patients as well.

Dr. Barry created a comfortable, curious, and nurturing environment within the team, promoting our growth as clinicians rather than worrying about looking "silly." She focused on educating in ways that she found helpful, but also encouraged the rest of us to share what we used so we could all grow together. She had multiple modalities to understand a topic. Furthermore, she helped improve our notes and presentations even during hectic mornings with seemingly record-setting numbers of new patients.
