

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Anthony Oyekan, MD

Resident

Department of Orthopaedic Surgery

It was my pleasure to work with Anthony during my short time in the ED. Although we spent less than a day together, his kindness, good nature, and gentle demeanor made him stand out. He is infectiously happy and made me feel like a valuable part of the team even as a medical student. He used a healthy amount of positive reinforcement and his obvious joy with his work made me, who has never considered orthopedics, excited about orthopedics!! This is such a special quality that Anthony possesses. He will be an excellent mentor and teacher to other residents and students and I strongly believe that it reflects very well on the department that he's a chief resident!

Overall, it was refreshing to meet him. Anthony was inclusionary and didn't gatekeep. He made me feel excited about his specialty and made it feel accessible. He made ortho feel fun and exciting and encouraged whatever skills he saw and was the first person actively engaging me as a student. Although it was probably a very little thing to him, it was huge to me.
