

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Julia Bulova
MS1 Student

Julia took time out of her weekend to practice with fellow students for the upcoming OSCE exam. She stayed beyond her own practice session to ensure other students felt comfortable with the range of techniques for examination. As a simulated standardized patient, she was thorough and cooperative and personally ensured that multiple students passed. Even after her assessment, she stayed in Morning Grounds the next day to continue to practice the full physical exam with others. Her kindness and attention to detail will certainly help her patients in any specialty. She is a great member of the Pitt Med community!
