

# Pitt Med Professionalism Accolade

## CONGRATULATIONS!

**Jordan Lamb**

**MS4 Student**

I ... learned of Jordan's Visual Learning Equity resource guide as part of the UPSOM FEB challenge. I am so appreciative of the work Jordan has done, raising the issue of the lack of appropriate diversity in the photos of different dermatologic disease manifestations in educational content, which has direct patient care implications. I really appreciated their example of how to make a slide better using different examples of skin tones AND the resources with links not only to textbooks available through HSLS but also the online image databases (with live links that work!) is SO helpful and leaves no possibility of excuses to not do the right thing. I commend Jordan Lamb for recognizing the problem and creating a fabulous educational resource to begin to correct it. Jordan truly demonstrates the qualities the PAIR system was designed to recognize: Outstanding dedication to excellence in education and patient care.
