

Pitt Med Professionalism Accolade

CONGRATULATIONS!

These students gave generously of their time to the vision mission at the Mission of Mercy event on 10/27 and 10/28. Over two days they worked alongside an interprofessional team to provide care for over 800 of our neighbors in need. During the event, our students directed traffic and measured glasses and refractive error. As importantly they made real connections with real people. They exhibited the highest level of professionalism, worked seamlessly as part of an interprofessional team, learned about social determinants of health and barriers to care and demonstrated a spirit of genuine care. Each of these students make me proud to be on the faculty at the University of Pittsburgh School of Medicine.
