

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Sabrina Bruno

MS2 Student

Sabrina went out of her way to create study materials to share with her classmates. She recognized the large memorization load of certain portions of the course and took the time to share resources she had created, reducing other students' workload. She not only improved our learning, but also took the time explain material despite the limitations on her own time. Sabrina is an outstanding medical student and colleague.
