

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Peyton Groves

MS1 Student

Peyton was such an excellent member of my small group this semester. Her excitement and interest for each small group session and patient panel creates such a warm and welcoming atmosphere for the patients and facilitators who visit our small group session. Her intelligent and thoughtful questions often led the patients who visited this semester to have interesting and honest discussions. Lastly, her optimistic and wellness-centered outlook is really appreciated and adds new dynamics to discussions of current events within the medical field. I am confident that regardless of what specialty she chooses, she will be an excellent communicator with patients and other members of the team!
