

# Pitt Med Professionalism Accolade

## CONGRATULATIONS!

**Tien Nguyen**

**MS2 Student**

Tien has been a joy to have in my small group thus far. During Cardiology, Tien not only consistently demonstrated an outstanding commitment to her own understanding of the class material, but also went above and beyond to ensure that those around her understood the material as well. There were several times where she stayed behind after workshops had ended to further explain confusing concepts, which I really appreciated. Tien is generous with her time and attention, and it is obvious that she deeply cares about those around her and roots for their success. Tien always offers thoughtful ideas; her excitement to learn has made workshops a more enriching, warm, and positive experience. With her energy and passion, Tien is a wonderful addition to the PittMed community, and I'm sure she will be an excellent addition to whichever specialty she chooses to pursue!
