

# Pitt Med Professionalism Accolade

## CONGRATULATIONS!

**Tom Rubino**

**MS2 Student**

Tom generously donated his time to help other students find anatomical landmarks using ultrasounds, and stayed well beyond his assessment time to make sure all of the Point of Care Ultrasound (POCUS) students felt comfortable and confident performing ultrasounds before engaging with standardized patients. This is a small instance of Tom's ability to go above and beyond and his excitement the first to volunteer to ensure fellow students have successful experiences. His skill to create comfort in new experiences makes him a strong member of the PittMed community.
