

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Ksheeraja Sriram

MS4 Student

Ksheeraja during her Pediatrics Acting Internship cared for a patient and family who needed a lot of support from the medical team. Shree spent a lot of time with the mother, listening to her concerns, engaging in shared decision making, and helping the family to accept an appropriate treatment plan.

The patient's mother filled out a Children's Hospital "Praise from Patients" form for "Dr. Shree". [She wrote] "Actually listened to what I had to say and worked with me to get a good plan. Very hardworking and dedicated. Not enough space for appropriate praise." Shree definitely deserves this recognition as she was instrumental in her patient's hospitalization and treatment.
