

# Pitt Med Professionalism Accolade

## CONGRATULATIONS!

**Alexandria Tso**

**MS2 Student**

Alexandria was in my small group during our Renal course. Alexandria embodies qualities of a great classmate that go beyond a classroom setting. When I had a question or a difficult time understanding a concept, Alexandria would take time out of her day to review those topics with me after class...I greatly appreciated Alexandria taking the time to listen to me, provide helpful advice, and be a source of care and companionship. I believe that great classmates are those that not only cheer on their classmates professionally and academically, but also care for their well-being and personal growth. Alexandria's kindness was instrumental to my success during Renal and this quality of hers should be recognized and applauded by our Pitt Med community.
