

Pitt Med Professionalism Accolade

CONGRATULATIONS!

Jack Waters
MS1 Student

Jack Waters has been a tremendous addition to the PittMed community thus far. His level of commitment and dedication to furthering his own education in the classroom setting and science at large through his relationship with research is incredibly admirable. In addition to his purposeful approach to school, Jack takes on each course with curiosity and is willing to make mistakes on the way to success. In specific, his excitement and energy during the Neuroscience course and willingness to teach concepts helped other students find interest and passions in neuroscience they did not have before. He has grown tremendously as a leader and a student throughout the MS1 year, and he will make an excellent physician-scientist someday!
